INFORMATION SCIENCES

Volumes 17, 18, 19

1979

An International Journal

Volume 17

PAUL KALATA (Morrestown, New Jersey) and ROLAND PRIEMER (Chicago, Illinois)
Linear Prediction, Filtering, and Smoothing: An Information-Theoretic Approach 1

A. EPHREMIDES (College Park, Maryland)
A Derivation of the Steady-State Random-Access Results without the Poisson Assumption 15

GUY JUMARIE (Montreal, Canada)
Hyperstability and Average Hyperstability Conditions for a Broad Class of Gaussian Stochastic Systems 23

MONIQUE PAVEL (Paris, France)
Pattern Recognition: The Categorical Setting 43

IZIDOR GERTNER and DAVID RAPPAPORT (Haifa, Israel)
Optimality Criteria for Controlled Discontinuous Processes 75

HIROTOMO ASO AND MASAYUKI KIMURA (Sendai, Japan)
Absolute Expediency of Learning Automata 91

MAYNARD THOMPSON (Bloomington, IN)
Information Diffusion in Populations with Immigration 113

TAKEHIKO MATSUDA (Tokyo, Japan) AND SHINZO TAKATSU (Pittsburgh, PA)
Characterization of Satisficing Decision Criterion 131

JOHN S. BARAS (College Park, MD) AND DEMETRIOS G. LAINIOTIS (Buffalo, NY)
Chandrasekhar Algorithms for Linear Time Varying Distributed Systems 153

Bhu Dev Sharma and Ved Priya (Delhi, India)
Source Coding Theorem and Its Converse with Side Information 169

Demetrios G. Lainiotis (Buffalo, NY)
Partitioning Filters 177

Katsushi Inoue and Itsuo Takanami (Ube, Japan)
Three-Way Tape-Bounded Two-Dimensional Turing Machines 195

Takehiko Matsuda (Tokyo, Japan)
and Shinzo Takatsu (Pittsburgh, PA)
Algebraic Properties of Satisficing Decision Criterion 221

Katsushi Inoue and Itsuo Takanami (Ube, Japan)
On-Line *n*-Bounded Multicounter Automata 239

Huibert Kwakernaak (Enschede, The Netherlands)
Fuzzy Random Variables—II. Algorithms and Examples for the Discrete Case 253

Volume 18

Jacques Maurin (Palaiseau, France)
Towards a Theory of Chance—Part I 1

Sunil R. Das, C. L. Sheng, Zen Chen,
and W. J. Hsu (Hsinchu, Taiwan)
Transition Matrices in the Measurement and Control of Synchronous Sequential Machines 47

R. Meersman and G. Rozenberg (Wilrijk, Belgium)
Parallelism and Synchronization in Two-Level Metacontrolled Substitution Grammars 67

William W. Agresti (Dearborn, MI)
Register Assignment in Tree-Structured Programs 83

MEL A. COLTER (Colorado Springs, CO)
A Combined Hierarchical and Steepest-Descent Clustering Algorithm 95

RONALD R. YAGER (New Rochelle, NY)
A Note on Probabilities of Fuzzy Events 113

R. KALABA, K. SPINGARN, AND L. TESFATSION (Los Angeles, CA)
Optimal Strategies for C^3 Problems—V. The Incorporation of Symmetrical Rationality 131

JACQUES MAURIN (Palaiseau, France)
Towards a Theory of Chance—Part II 141

R. S. BUCY (Los Angeles, CA)
Information and Filtering 179

R. MEERSMAN, G. ROZENBERG (Wilrijk, Belgium), AND D. VERMEIR (Leuven, Belgium)
Persistent ET0L Systems 189

BHU DEV SHARMA (Delhi, India) AND ISHWAR SINGH (Jaora, India)
On the Entropy Function of Degree β 213

INDER JEET TANEJA (Florianopólis, Brazil)
On the Information Improvement Due to 2 and N Revisions 223

MARTIN OSBORNE (Bellingham, WA)
Using Two-Class Classifiers for Function Estimation 235

KATSUSHI INOUE AND ITSUO TAKANAMI (Ube, Japan)
Closure Properties of Three-Way and Four-Way Tape-Bounded Two-Dimensional Turing Machines 247

Volume 19

KATSUSHI INOUE AND ITSUO TAKANAMI (Ube, Japan)
Three-Way Two-Dimensional Multicounter Automata 1

Sargur N. Srihari (Amherst, NY), Lee J. White (Columbus, OH), and Thomas Snabb (Dearborn, MI)
Identity Conditions for Nearest-Neighbor and Potential-Function Classifiers 21

Ryuuzo Shingai (Fukui, Japan)
Periodic Behavior of One-Dimensional Uniform Threshold Circuits 33

Yoshihiro Adachi and Yasayuki Funahashi (Nagoya, Japan)
Existence of Bilinear Observers for Bilinear Systems 67

Manohar Lal Kaushik (New Delhi, India)
Necessary and Sufficient Number of Parity Checks in Codes Correcting Random Errors and Bursts with Weight Constraints under New Metric 81

Edward O. Thorp (Irvine, CA)
The Probability That a Matrix Has a Saddle Point 91

Sudhir K. Arora and K. C. Smith (Toronto, Canada)
A Theory of Well-Connected Relations 97

M. W. A. Smith (Antrim, Northern Ireland) and A. P. Roberts (Belfast, Northern Ireland)
The Relationship between a Continuous-Time Identification Algorithm Based on the Deterministic Filter and Least-Squares Methods 135

Eugene S. Santos (Youngstown, OH)
Abstract Families of Relations 155

Shigeko Seki (Kyoto, Japan)
Real-Time Recognition of Two-Dimensional Tapes by Cellular Automata 179

Yasuhiko Takahara, Bumpei Nakano, and Kyoichi Kijima (Tokyo, Japan)
Characterization of the Linear Weighted Sum Decision Principle 199

J. J. McGregor (Sheffield, England)
Relational Consistency Algorithms and Their Applications in Finding Subgraph and Graph Isormorphisms 229

Giovanni Guida (Milan, Italy) and Marco Somalvico (Standford, CA)
A Method for Computing Heuristics in Problem Solving 251
